

**Photojournalism** (adapted from N4C). Photojournalism is the process of storytelling using the medium of photography as your story telling device.

a) The image should be a window into the event, captured in real time and not posed. The type of photograph that one sees in the newspaper or magazine is what is meant.

b) An element of human interest is important, but not necessary.

c) Alterations to the image are acceptable, but the image must look realistic and no changing the story by cloning things in or out.
