**Attachment – Room Technical Difficulties Recommendations**

I think we need an AV team. Right now if I do not show up, I am not certain we will have a meeting. Put together a process document. Normal operation and fall back procedures. The AV team shows up 30 minutes before and setup / tests, installs fall back solutions as needed. I do not always get to focus on this, supporting the salon, etc, prior to the start of the meeting.

I also think we need to be prepared for equipment failures. It will happen. It happens at work, we just move to another room. We do not have that option.

Resources we need to hold a meeting;

Presentation Laptop - currently the Club Laptop - New should be reliable, I still bring mine as a spare just in case.

Monitor laptop - Currently my laptop. - See what is being "broadcast". Mute participants who have not muted themselves, Used to test the setup prior to the meeting. Need a wireless headset to listen in to the audio. Could it be done using a phone / tablet as a backup? An AV team member needs to be monitoring this.

Projector - Club has one, we should confirm it works and bring it. Just need a wall if the screen does not come down. We had one meeting where it finally started working just a few minutes before the meeting.

.  
Sound - Club should have a speaker system, just a decent set of PC speakers is likely good enough. May plug into the same adaptor as the microphones.

Internet - Would need someone with a phone that supports a hotspot and unlimited data, This has never been an issue, so far.

Audience microphone wrangler. - AV team member to move mic to participants in the audience for questions / comments / introduction.

Extension cord and power strip for projector and sound system.

USB C hub, with USB 3 ports. Plug in the microphone adapter, Microphone power supply, USB drives with presentations.
